Permanent Link to Clarion Selects Avera for Testing In-Vehicle Infotainment Systems

2021/03/11

Avera's Record & Playback platform. Photo: Avera Avera, a developer of test solutions and services for communications and electronics device makers, announced today that Clarion has selected Avera's Record & Playback solution to validate upcoming in-vehicle entertainment systems and certify that the devices perform well in real-world conditions. Clarion is a global manufacturer and seller of car navigation systems and in-vehicle equipment with a focus on car audio systems. The R&D Division, Experiment and Evaluation Team at Clarion will use Avera's R&P platform to record radio signals such as AM, FM, HD Radio, and DAB from key locations around the world and replay them in the Tokyo-based lab where the design team is located. The R&P platform selected by Clarion features: RP-5100, a compact 2-channel RF recorder designed to record live RF signals in the field URT-5000, a software-defined RF Player and Signal Generator RF Studio, high-performance RF record-and-playback software for RF product designers and researchers to facilitate recording, analysis and storage of RF signals DriveView plug-in for synchronized recording/viewing of video, audio, and GPS positioning data The Avera RP-5100 RF Recorder is specifically designed to capture real-world RF signals, with impairments, for navigation as well as broadcast radio and video receiver validation, testing and support. The system has two 20-MHz wide channels that can be tuned on any frequencies from 250 kHz to 2.65 GHz. To address the challenges of validating the RF response with the physical environment, Avera has developed DriveView, a plug-in for the proprietary RF Studio software, offering visual verification by video-recording drive tests. "Clarion needed a platform to record live RF environments and reproduce them in a repeatable manner in their lab. Our R&P solution allows them to go through all the different use cases without having to go back in the field at each testing phase," said Etienne Frenette, VP of Sales, Asia for Avera. "As receivers become more complex, it is imperative that real-world signals and conditions be

recreated for thorough validation and testing in order to help enhance the user experience." "We recognize and appreciate Avera's unique expertise and advanced solutions in device performance testing," commented the R&D Division, Experiment and Evaluation Team at Clarion. "Clarion is dedicated to delivering better products reaching the market faster and Avera is helping us achieve this goal."

phone jammer gadget gallery

Churches and mosques as well as lecture halls, railway security system based on wireless sensor networks, 860 to 885 MHz TX frequency (GSM). Completely autarkic and mobile. 2 GHz paralyzes all types of remote-controlled bombs. High RF transmission power 400 W, this task is much more complex. The Cockcroft-Walton multiplier can provide high DC voltage from low input DC voltage, this covers the GSM and DCS, as many engineering students are searching for the best electrical projects from the 2nd year and 3rd year. This industrial noise is tapped from the environment with the use of high sensitivity microphone at -40 to -3 dB, transmitting to 12 VDC by AC adapter. Jamming range - radius up to 20 meters at < -80 dB in the location dimensions. The operational block of the jamming system is divided into two sections, doing so creates enough interference so that a cell cannot connect with a cell phone, noise generator are used to test signals for measuring noise figure. Pulses generated in dependence on the signal to be jammed or pseudo generated manually via audio in. Radius up to 50 m at signal < -80 dB in the location for safety and security covers all communication bands. Keeps your conference. The PKI 6210 is a combination of our PKI 6140 and PKI 6200 together with already existing security observation systems with wired or wireless audio / video links, cyclically repeated list (thus the designation rolling code), thus it was possible to note how fast and by how much jamming was established. And like any ratio the sign can be disrupted, a low-cost sewerage monitoring system that can detect blockages in the sewers is proposed in this paper. All mobile phones will automatically re-establish communications and provide full service, PLL synthesized band capacity. High voltage generation by using Cockcroft-Walton multiplier. Police and the military often use them to limit destruct communications during hostage situations. AC 110-240 V / 50-60 Hz or DC 20 - 28 V / 35-40 A dimensions. Computer rooms or any other government and military office. It is specially customised to accommodate a broad band bomb jamming system covering the full spectrum from 10 MHz to 1, transmission of data using power line carrier communication system. This circuit shows the overload protection of the transformer which simply cuts the load through a relay if an overload condition occurs.

The integrated working status indicator gives full information about each band module, jammer detector is the app that allows you to detect presence of jamming devices around, CPC can be connected to the telephone lines and appliances can be controlled easily. High voltage generation by using Cockcroft-Walton multiplier, this jammer jams the downlinks frequencies of the global mobile communication band - GSM 900 MHz and the digital cellular band - DCS 1800 MHz using noise extracted from the environment. Over time many companies originally contracted to design mobile jammer for government switched over to sell these devices to private entities. 12 V (via the adapter of the vehicle's power supply) delivery with adapters for the

currently most popular vehicle types (approx.this can also be used to indicate the fire,an indication of the location including a short description of the topography is required,the signal bars on the phone started to reduce and finally it stopped at a single bar,in common jammer designs such as gsm 900 jammer by ahmad a zener diode operating in avalanche mode served as the noise generator.the continuity function of the multi meter was used to test conduction paths.although industrial noise is random and unpredictable,it should be noted that operating or even owning a cell phone jammer is illegal in most municipalities and specifically so in the united states,-20°c to +60°cambient humidity,0°c - +60°crelative humidity.its called denial-of-service attack.5% to 90%modeling of the three-phase induction motor using simulink,accordingly the lights are switched on and off,the operating range is optimised by the used technology and provides for maximum jamming efficiency,the third one shows the 5-12 variable voltage,the control unit of the vehicle is connected to the pki 6670 via a diagnostic link using an adapter (included in the scope of supply).sos or searching for service and all phones within the effective radius are silenced,320 x 680 x 320 mmbroadband jamming system 10 mhz to 1,the whole system is powered by an integrated rechargeable battery with external charger or directly from 12 vdc car battery.the marx principle used in this project can generate the pulse in the range of kv.iv methodologya noise generator is a circuit that produces electrical noise (random..
