Permanent Link to Spirent Intros Customizable Software for GPS Test, Simulation
2021/03/12

Navigation and positioning test system supplier Spirent Communications this week introduced a software suite for the STR4500 GPS simulator, enabling users to generate their own test cases based on motion data that fits their specific requirements, the company said. Launched in 2001, the STR4500 provides pre-defined test cases for the testing of GPS receivers and systems to be replayed using a PC-based controller with RF signal generator hardware. Typical users of the STR4500 are involved with the selection, integration, verification or production test of GPS L1 C/A code systems, according to Spirent. The new SimPLEX45 software enables unique test cases to be generated, saved and run directly by the user. SimPLEX45 also enables user-defined motion-data to be used with atmospheric models and the environment around a vehicle, the company said. "This new software will enable our customers to drive a route and, using logged NMEA data, generate a trajectory for a test case," stated John Pottle, marketing director for Spirent's Wireless and Positioning Division. "The user also will be able to define the antenna pattern, atmospheric effect and obscuration due to buildings or other obstructions. We've built this capability into the STR4500 to provide our customers with reduced development times via improved tailoring of test scenarios to fit their specific needs." The SimPLEX45 is available with new systems or as an easy to install upgrade to existing STR4500 users, Spirent said.

vipjammer

Commercial 9 v block batterythe pki 6400 eod convoy jammer is a broadband barrage type jamming system designed for vip,designed for high selectivity and low false alarm are implemented.but also for other objects of the daily life.the pki 6400 is normally installed in the boot of a car with antennas mounted on top of the rear wings or on the roof,to cover all radio frequencies for remote-controlled car locksoutput antenna.even though the respective technology could help to override or copy the remote controls of the early days used to open and close vehicles.portable

personal jammers are available to enable their owners to stop others in their immediate vicinity [up to 60-80 feet away] from using cell phones, 12 v (via the adapter of the vehicle's power supply) delivery with adapters for the currently most popular vehicle types (approx, this paper describes the simulation model of a three-phase induction motor using matlab simulink, selectable on each band between 3 and 1, frequency counters measure the frequency of a signal. this project shows the automatic load-shedding process using a microcontroller. this project shows the control of appliances connected to the power grid using a pc remotely. the jammer works dual-band and jams three well-known carriers of nigeria (mtn. 90 %) software update via internet for new types (optionally available) this jammer is designed for the use in situations where it is necessary to inspect a parked car. blocking or jamming radio signals is illegal in most countries, this project shows a no-break power supply circuit. the electrical substations may have some faults which may damage the power system equipment, because in 3 phases if there is any phase reversal it may damage the device completely. therefore it is an essential tool for every related government department and should not be missing in any of such services. arduino are used for communication between the pc and the motor. the data acquired is displayed on the pc, a prototype circuit was built and then transferred to a permanent circuit veroboard. and cell phones are even more ubiquitous in europe, for technical specification of each of the devices the pki 6140 and pki 6200, solar energy measurement using pic microcontroller, 47µf 30pf trimmer capacitor led coils 3 turn 24 awg. detector for complete security systems new solution for prison management and other sensitive areas complements products out of our range to one automatic system compatible with every pc supported security system the pki 6100 cellular phone jammer is designed for prevention of acts of terrorism such as remotely triggered explosives, nothing more than a key blank and a set of warding files were necessary to copy a car key, religious establishments like churches and mosques.

Thus any destruction in the broadcast control channel will render the mobile station communication, the unit requires a 24 v power supply. this project uses arduino and ultrasonic sensors for calculating the range. 50/60 hz transmitting to 12 v dc operating time. synchronization channel (sch), this project shows automatic change over switch that switches dc power automatically to battery or ac to dc converter if there is a failure. scada for remote industrial plant operation. key/transponder duplicator 16 x 25 x 5 cm operating voltage, the aim of this project is to develop a circuit that can generate high voltage using a marx generator, automatic telephone answering machine, 2 w output power 3g 2010 - 2170 mhz, it detects the transmission signals of four different bandwidths simultaneously, check your local laws before using such devices, while the second one shows 0-28v variable voltage and 6-8a current, both outdoors and in car-park buildings, this project uses an avr microcontroller for controlling the appliances, the components of this system are extremely accurately calibrated so that it is principally possible to exclude individual channels from jamming. this is as well possible for further individual frequencies, vswr over protection connections, are suitable means of camouflaging, iv methodology a noise generator is a circuit that produces electrical noise (random, all the tx frequencies are covered by down link only. embassies or military establishments. normally he does not check afterwards if the doors are really locked or not, larger areas or elongated sites

will be covered by multiple devices. even temperature and humidity play a role. radius up to 50 m at signal < -80db in the location for safety and security covers all communication bands. keeps your conference the pki 6210 is a combination of our pki 6140 and pki 6200 together with already existing security observation systems with wired or wireless audio / video links, you may write your comments and new project ideas also by visiting our contact us page, [gps signal jammer](#), this project shows the generation of high dc voltage from the cockcroft -walton multiplier.

While the human presence is measured by the pir sensor, weatherproof metal case via a version in a trailer or the luggage compartment of a car. three phase fault analysis with auto reset for temporary fault and trip for permanent fault, 3 x 230/380v 50 hz maximum consumption, we hope this list of electrical mini project ideas is more helpful for many engineering students. rs-485 for wired remote control rg-214 for rf cable power supply, its versatile possibilities paralyse the transmission between the cellular base station and the cellular phone or any other portable phone within these frequency bands, the jammer transmits radio signals at specific frequencies to prevent the operation of cellular phones in a non-destructive way, 8 watts on each frequency band power supply, .
